2.7% Accuracy

Percentage of tax filings flagged by the AUR

Only 2.7% of our filings are detected as potentially underreporting by the IRS's AUR system.

At Accuracy Accounting, our number one goal is to make the tax and legal process as painless as possible. That's the lens through which we do business, and that's how we achieve such great results.

"The business that I run is small, but that doesn't mean it's simple. We had chosen a different firm to assist with bookkeeping and auditing; that had a tendency to not answer our questions promptly.

Accuracy Accounting cured our tax season headache, even finding over two thousand dollars in unclaimed deductions that the other firm had missed."
